

Bristol Braille Technology CIC (BBT) is a blind-led organisation that includes blind people in the research and development process of braille reading tools and innovations. By promoting diversity and inclusion within the development of the Canute 360, the features, design and function of the Canute 360 multi-line Braille reader blind people can undertake activities relevant to their everyday lives. BBT aim to promote equality and support more blind people to achieve their potential.

“

My Canute 360 has changed the way I live for the better. Reading is my passion, and now I have full access to any books, newspapers and information I want to read.

”

John

“

Before I received my Canute 360, I only listened to audiobooks, but now I can easily read independently. I can read topics that genuinely interest me at my own pace. The refreshable Braille display has increased my reading speed.

”

Steph

“

I am passionate about reading research papers. The Canute 360 allows me to interpret data, graphs, and diagrams. I can even understand sheet music. This was virtually impossible before I had my Canute 360.

”

Jane

**"Bristol Braille Technology is pushing forward the boundaries of literacy for hundreds of thousands of blind people."
Mr Sean Randall, New College Worcester**
